

Pneumatic Series

Dimensions: 22" x 14" x 14"
Weight: 42 lbs.

HP-Series, pneumatic driven hydrostatic test pumps, available with pressures up to 30,000 PSI. Versatile and compact designs, for testing in small confined spaces or remote locations such as on board ships and oil rigs. Lightweight and portable these units average under 50 lbs, and are easily maneuverable between test sites.

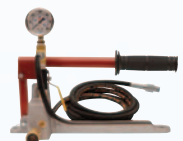

HP-10 • 10,000 PSI

- Ability to start/stop while under pressure
- Special order options available, built to suit
- Specific units capable of various chemicals, jet fuels
- Dual gauge and high flow options available

HP-20 • 20,000 PSI

MODEL	VOLUME	PSI
HP - 3/500	3 GPM	500
HP - 7/10	7 GPM	1,000
HP - 35/20	3.5 GPM	2,000
HP - 25/35	2.5 GPM	3,500
HP - 1/55	1 GPM	5,500
HP - 10	80 CU IN	10,000
HP - 10-B, V	240 CU IN	10,000
HP - 20	80 CU IN	20,000
HP - 30	80 CU IN	30,000

STANDARD FEATURES

100 PSI AIR

needing only standard shop air

ROLL CAGE

enclosed in a rugged roll cage of heavy gauge welded steel

HOSE

8' high pressure outlet hose

INLINE STRAINER

stainless 100 mesh strainer, for pump protection from debris

GAUGE

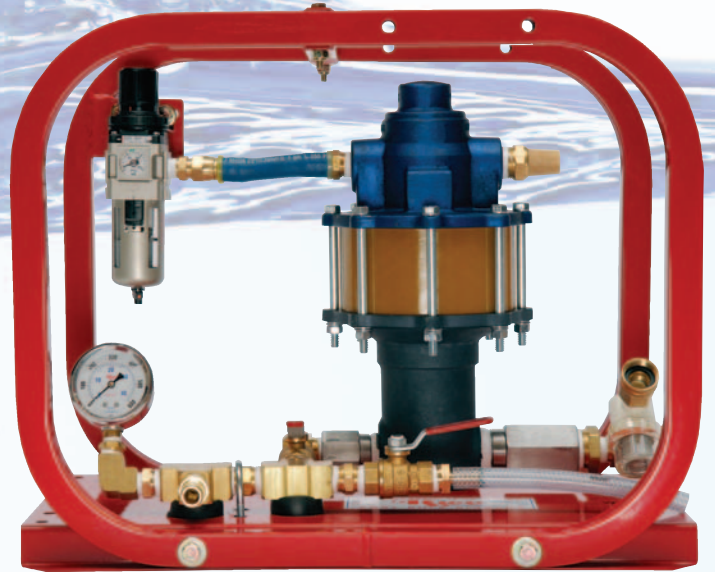

stainless steel liquid filled, ensures less flutter, with accurate readings

HP-10V
10,000 PSI

HP-10B
10,000 PSI

HP-3/500 • 500 PSI

ACCESSORIES

FHWA-1

Pressure wand accessory makes your fire hose tester a year round contributor to your equipment fleet.

Wheel & Handle Kits

Truly the most portable test pumps on the market, RICE makes available an optional sturdy wheel and handle kit.

Rice
HYDRO INC.

Pressure Feed Tanks

The pressure tank assembly, an accessory designed to allow the force-feeding of diaphragm test pumps.
